ISO 19650 BIM training

✓ Optimize Information Management in BIM

About us

► About Us

BIM Design Hub is an online training center offering ISO 19650 BIM training designed to meet the growing demands of the construction industry and certification standards. Our focus is on enhancing information management and technical skills to improve efficiency and business performance within the AEC industry.

BIM Design Hub has partnered with innovative companies and supports synergies that add value to the market and implement innovation-based business transformations.

Training Overview

Personalized learning

Online self-paced courses offer learners the flexibility to learn at their own pace and convenience according to their schedule.

● BIM Certification

Recognized CPD Certificates and Digital Badges, showcasing your skills, achievements, and commitment to professional growth.

● Experienced instructors

Our training is led by industry professionals that share their expertise and knowledge to the learning environment.

BIM Foundations

▼ Course Details

The Course covers the evolution from BIM Level 2 to ISO 19650 and identifies the key components that support information management for the project delivery phase in line with ISO 19650-1 and 2, with a reference to the UK BIM standards.

▼ Course Overview

The BIM Foundations course provides a detailed overview of the concepts and principles of information management in line with the international standards ISO 19650-1 and 2 and provides in depth insights into the requirements to achieving ISO 19650 compliance in BIM projects.

▼ BIM FOUNDATIONS

Course Contents

The BIM Foundations course includes six modules and is designed for self-paced learning, delivered through an online platform that provides a rich learning environment.

▶▶ **BIM AND DIGITAL CONSTRUCTION**

▶▶ **BIM ADOPTION**

▶▶ **BIM AS A TECHNOLOGY**

▶▶ **OVERVIEW OF BIM STANDARDS**

▶▶ **ISO 19650 CONCEPTS AND PRINCIPLES**

▶▶ **BIM IMPLEMENTATION KEY ELEMENTS**

▼ BIM FOUNDATIONS

Learning Outcomes

- Define BIM, identify its industry benefits and adoption.
- Understand the evolution of BIM from the UK's BIM Level 2 to ISO 19650 standards.
- Identify BIM as a technology (CDE, open BIM standards, uses, federation, clash detection and COBie).
- Recognize ISO 19650 terminology, concepts, and principles.
- Understand the requirements for an ISO 19650 BIM-compliant project.
- Recognize and manage different stages and information requirements in BIM projects.
- Explain the Information Standard and the Information Production Methods and Procedures.
- Understand the Level of Information Need standard.

BIM Information Management

▼ Course Details

The Course describes the activities that occur during the Information Management stages from the Assessment and Need until the Project Close out and explains the key documents related to Information Delivery planning.

▼ Course Overview

The BIM Information Management Course provides a detailed overview of Information Management in line with the international standard ISO 19650-2 with a reference to the UK standards for BIM Implementation.

▼ BIM INFORMATION MANAGEMENT

Course Contents

The BIM Information Management course includes five modules and is designed for self-paced learning, delivered through an online platform that provides a rich learning environment.

▶▶ **INFORMATION MANAGEMENT TEAMS**

▶▶ **ASSESSMENT AND NEED AND PROCUREMENT**

▶▶ **PLANNING**

▶▶ **PRODUCTION AND PROJECT CLOSE OUT**

▶▶ **BEP AND INFORMATION DELIVERY PLANNING**

▼ BIM INFORMATION MANAGEMENT

Learning Outcomes

- Understand ISO 19650 key terminology and the Information management team's structure.
- Learn how teams generate, review, approve, and publish information within the Information delivery cycle.
- Discover the client's pivotal role in setting Tender requirements and selecting the right teams.

- Understand the tasks and responsibilities of the different parties throughout the information delivery cycle.
- Identify ways to streamline project workflows and recommended resources at each stage.
- Master BIM Execution Planning by developing essential documents for information transfer and delivery.

Learning features

▶ **Self-paced training**

Self-paced training enables you to learn at your own pace and convenience according to your schedule.

▶ **Portfolio activity**

Portfolio activities help you understand what you have learned and record the course material over time.

▶ **Discussion Forum**

In the Discussion forum, you can interact with others and participate in the BIM discussion.

▶ **Publications & Downloads**

Document templates, reports and articles related to information management.

▶ **Quizzes and Assessment tests**

Quizzes reinforce topic understanding, while the assessment tests learners' knowledge from the course.

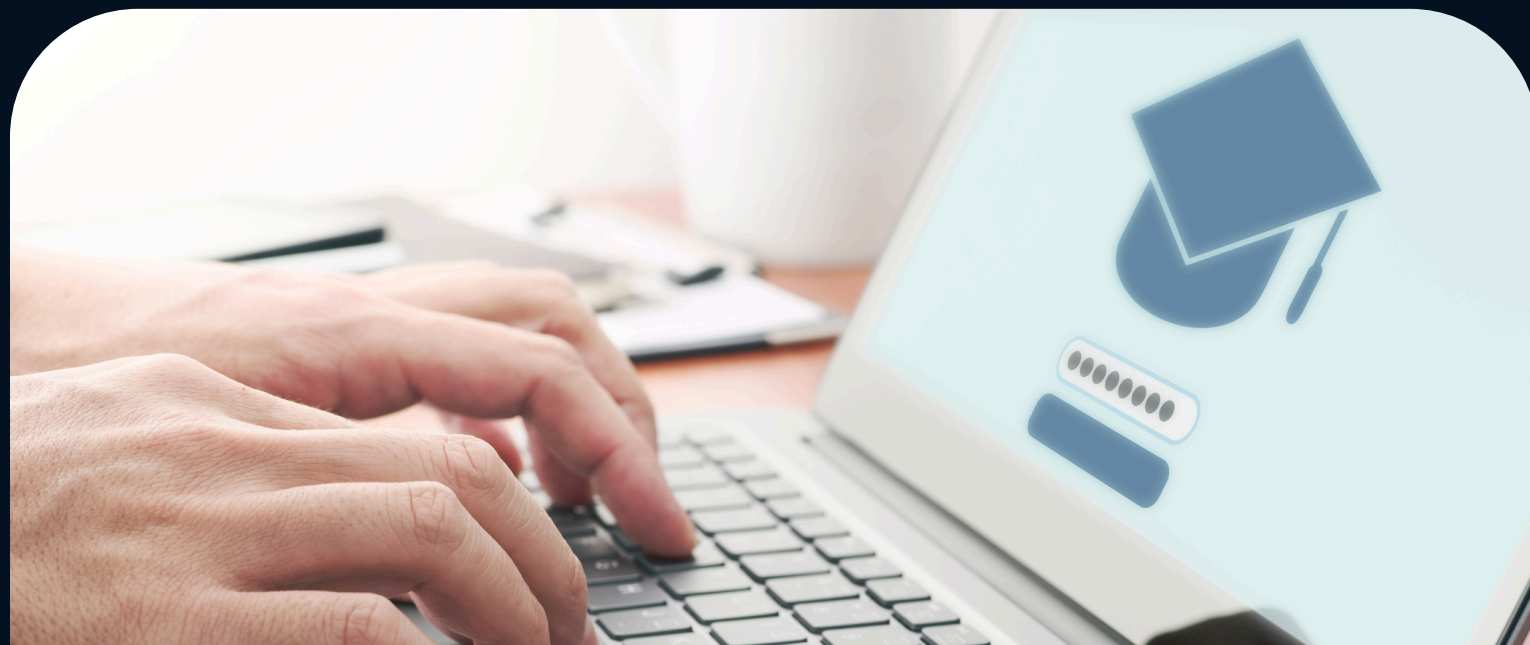

▶ **Further study material**

Further study material is provided at the end of each Module for further engaging with the topic in discussion.

BIM Certification

BIM Design Hub offers the Information Management Practitioner and Information Management Professional certifications, complete with internationally recognized CPD Certificates and shareable Digital Badges that highlight your expertise.

CPD Certificates

BIM Design Hub is a member of the CPD Certification Service in the UK.

Upon successful completion of our courses, you will receive an internationally recognized CPD certificate that demonstrates your commitment to professional development in the AEC sector.

Digital Badges

BIM Design Hub has partnered with Openbadges.me to provide digital badges that showcase your skills and achievements in BM information management.

Each badge can be easily shared via a unique link and includes metadata outlining your accomplishment and the criteria for earning it.

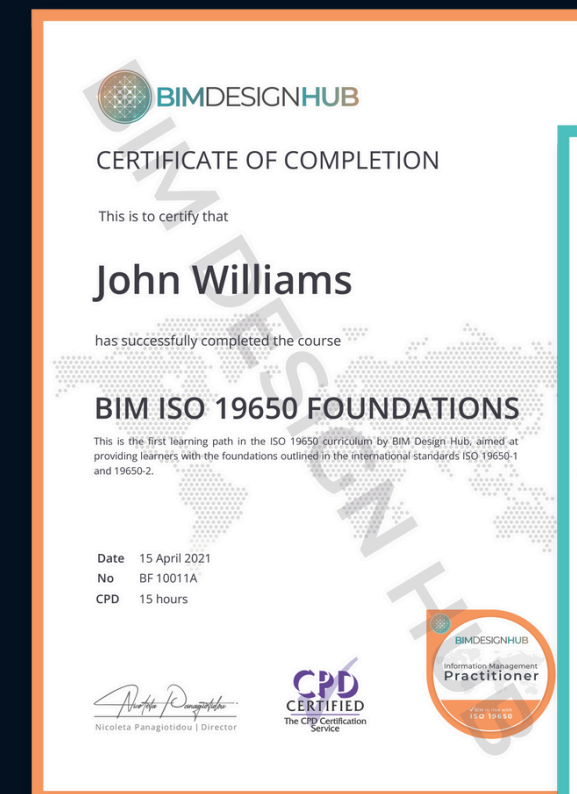

CPD Certificates

✓ CPD Benefits:

- ▶ Validate skills and knowledge with a formal recognition of your achievements.
- ▶ Demonstrate dedication to continuous learning and self-improvement.
- ▶ Improve career opportunities, stand out by showcasing your knowledge and skills.

Digital Badges

Openbadges.me

Digital Badges Benefits:

- ▶ Earn formal recognition of your skills, highlighting your dedication and hard work.
- ▶ Share your badges on social media, LinkedIn, or your resume to enhance visibility.
- ▶ Verify your credentials with badges showcasing your skills to peers and employers.

Information Management Practitioner

Certification

This certification recognizes professionals with a strong foundation in Building Information Modelling (BIM) aligned with ISO 19650. It validates their knowledge of the key elements of information management, including stakeholder roles and the technological aspects for BIM implementation.

Earning criteria

- ▶ Complete the self-paced course 'BIM Foundations' by Design Hub.
- ▶ Achieved a minimum pass mark of 70% on the course assessment.

Information Management Professional

Certification

This certification recognizes professionals with a practical understanding of BIM in line with ISO 19650-2. It validates their knowledge of the activities, tasks and resources of the information management stages for the efficient production, management and delivery of information.

Earning criteria

- ▶ Complete the self-paced course 'BIM Information Management' by Design Hub.
- ▶ Achieved a minimum pass mark of 70% on the course assessment.

Testimonials

“

“The courses are excellent and well-structured, helping me understand and bridge the knowledge gap between PAS and ISO standards in this complex subject.”

Andrew, Ireland

“I am extremely satisfied with the courses. They make complex topics clear with real-world examples, deepening my understanding and providing practical tools for my work.”

Kristina, UK

“BIM Design Hub ISO 19650 Training is a “World Class” unique training portal that delivers high-value resources and knowledge that are needed by every BIM professional.”

Eron, Israel

“The BIM Foundations course is one of the most well-structured online BIM courses I’ve come across. It’s aligned with ISO 19650 and clearly explains concepts, offering rich and unique content.”

Marios, Cyprus

Why an international standard for BIM

Read more

► Conceptual and Practical Guidance

ISO 19650 series of standards provides a conceptual and practical guidance to BIM Information Management. ISO 19650 includes the best practice of the UK 1192 series, represents the latest industry standards and provides a unified international approach to BIM implementation.

► Information management in BIM

ISO 19650 is more than just a set of guidelines; it represents a significant shift in the way the construction industry operates. By prioritizing standardized information management, interoperability, information security, and health and safety, ISO 19650 is introducing in a new era of efficiency, collaboration, and sustainability.
